

## Hotplate H 30/45

Heater for big vessels

- anodized aluminium hotplate: square 450x300 mm, 2000 watt
- continuously adjustable temperature: 40-350 °C

The aluminium hotplate features a precise temperature control.

The surface of the hotplate will remain a flat even after many thermal shocks this means there is optimum contact between hotplate and vessel to guarantee for an even heating of the liquid.
